Technical work:

- Makerspace Manager of the Department of Landscape Architecture Fabrication Lab at Cornell CALS. Developed and taught rapid fabrication curricula for DLA students and faculty. (2021 - 2022)
- Computer Vision Software Engineer with the Macaulay Library & Merlin AI teams. Assisted in the development and launch of Merlin Sound ID. Aided in R&D and the implementation of internal fine-grained machine learning annotation tools for audio classification. Built internal classification and model evaluation web APIs. Assisted in the streamlining of Macaulay Library MLOps and asset ingestion pipeline. (2019 - 2021)
- D&M Makerspace Fellow (Plymouth State University)
 - Technical Lead, hardware & software developer for Makerspace clients & partners. Curricular consultant for University faculty and students.

Notable D&M projects include:

- Led hardware & software development for a local motorsport virtualization startup. Employed numerous collaborative rapid fabrication technologies (Fusion 360 cloud & git as VCS, iterative design via laser & plasma cutting, 3d printing) to bring client's proposal to a complete, provisionally patented demonstration.
- CoreGuard Demo Hardware- designed & manufactured Dover Microsystems's FPGA display hardware for their CoreGuard product Demonstrations. Maintain the iterative designs as free, open source hardware on GitHub.
- Designed and manufactured COVID-19 relief equipment (face shields, ventilators, masks), distributed to a variety of NH emergency services and hospitals.
- Robotics / Electromechanics Teaching Assistant at Plymouth State University
- Full stack software contracting as Columbari.us LLC. Expertise in an agile development environment includes scripting, API building, automation & visualization with Python & R (associated libraries including Pandas & NumPy, Tensorflow, matplotlib & jupyter, ArcPy & the QGIS CLI, tidyverse & ggplot2, etc), integration with cloud services (including AWS, GCP, Docker, Heroku, ArcGIS Online). Full stack experience spans a variety of web technologies (Flask, Node JS, React JS, Leaflet JS, Shiny R) and services; extensive work with DEM, LiDAR, OpenStreetMap data, topographic modeling for remote sensing & digital reconstruction.

Public geospatial clients include:

- The National Park Service (developed geospatial web services with R, ArcGIS, Google Maps API)
- The Foundation for Healthy Communities & GPRED (developed GIS project website & data cleaning scripts with R, Bash, ArcGIS Online)
- The Northern Border Regional Commission (developed web GIS data service with R, arcade expression language)
- Graduate ornithology at Plymouth State University (R, Python, QGIS, etc for academic literature)
- Geospatial consulting & avian field technician with Dr. Lenoard Reitsma (Plymouth State) and his graduate students (data collection cleaning / analysis, database management, cartography & data visualization), additional grant work with Cornell's eBird dataset (2017-2019)
